Assignment 7

Use the online mock-up tool:

https://moqups.com/

to create a mock-up of an app, to be used on smartphones or tablets, that allows a user to quickly look up different categories of statistics for their favorite athletes or celebrities and to tweet them out.

Think about the type of interaction and the interface, and a typical use case for an average user. Submit a screenshot of your mock-up and a brief paragraph explaining your design.
